Advantages of technology

GAZMODEL

ООО "Тулский литейно-механический завод"
(Tula Casting and Mechanical Plant, LLC)

The company "Tulskiy liteyno-mekhanicheskiy zavod "GAZMODEL" (Tula Casting and Mechanical Plant GAZMODEL) is specialized in the foundry of various products and equipment manufactured using unique technologies. Through innovative methods and vast experience of our specialists, we have achieved a noticeable reduction of the cost of casting without compromising the quality of the finished products.

We are always open to new cooperation, regardless of the complexity of our task. In addition, our employees try to approach each order individually, taking into account all the technical and production capabilities of the company.

Reducing

Our opportunities

We use modern and high-precision domestic equipment. In this way, our customers are guaranteed a high level of output product quality, as well as the improvement of its technical and operational properties.

The result of our long and hard work is the uninterrupted production of quality products using such raw materials as cast iron, aluminum and different types of modern steel. All materials used in the production cycle have passed the certification procedure.
